INSTALLATION INSTRUCTIONS

NOTE: Before taping template to wall, use level to ensure template is level. Before drilling holes use a level to make sure the holes marked are level.

Ensure that product is installed in accordance with ANSI/NFPA 70, National Electrical CODE (NEC)

1. **Tape this template to the drywall.**
   Place the template between 2 studs **16" on Center**; ensuring that the marks are **centered on the studs.**

2. **Mark the location of the holes.**
   Use a punch or screw to mark holes in each corner.

3. **Remove the template and drill the lead holes.**
   Use a 1/4" or smaller bit, drill through all the holes marked in previous step.

4. **Ensure to only use the supplied mounting hardware.**

STRONG
